## Thermoplastic "SEBS" rubber clog

SEBS is a thermoplastic rubber that stands out for its lightness, strenght resistance and flexibility. The clog is completely made of a recyclable material, therefore sustainable for the environment.

The garden galosh is entirely made in Italy; this line of clogs is suitable for both women and men and is available in double sizes from 35-36 to 47-48. It can be made in different colours, even pantone colours. Upon request it can be also equipped with a removable pre-formed insole.
